Charge It!

Financial Management Series

Description

MaxQ's Charge-it provides automated credit card processing – at the touch of a button – allowing you to realize immediate benefits through more efficient processing and streamlined operations. Whether used with the Accounts Receivable module, the Order Management module or implemented as part of Web Order, it supports all major credit card processors using a shared internet connection. It simplifies end-of-day closing and automatically books all related accounting transactions.

Access Credit Card Transaction screen directly from the Order Management module. Once authorized, click process – all AR transactions are booked automatically.

Benefits:

Superior Processes. Automatically emails order confirmations and shipment confirmations to customers.

Greater Optimization. Split order/invoice against unlimited credit cards or apply multiple credit cards against a single sales order.

Seamless Integration. Adds easy and efficient credit card processing to Microsoft Business Solutions Solomon. Access from Solomon menu, sales order entry screen, AR invoice screen or shipper screen. Uses Address Verification Service (AVS) to confirm legitimacy of transactions.

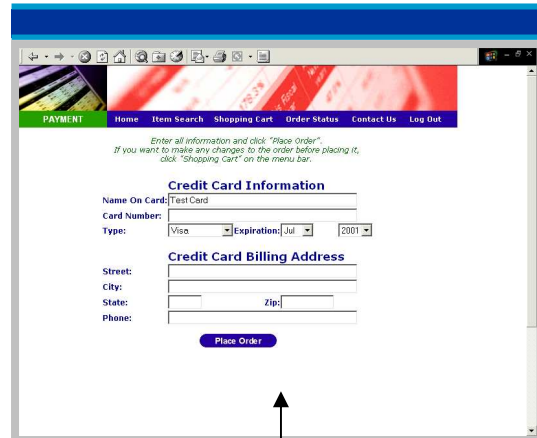

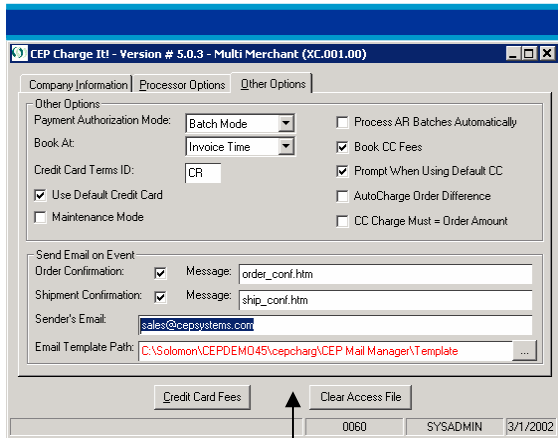

Reduced Costs. Decreases on-line order processing time - processes credit card transactions in seconds.

Increased Efficiency. Process credit cards directly from your website through the Web Order module.

Valuable Analysis. Automatic creation of all transactions to book fees, mark invoices as paid, book revenue and create receivable.

Business Solutions for Maximum Performance
