Microsoft Dynamics™ SL

With Microsoft Dynamics SL, you can take advantage of the benefits of conducting business electronically to solidify your position in the value chain. Microsoft Dynamics SL eCommerce Gateway–EDI Edition works with Microsoft Dynamics SL Order Management to help integrate and automate business transactions with customers, vendors, and remote warehouses.

Benefits

• Gain a competitive edge
  Compete better in today's time-critical, global marketplace with electronic data interchange (EDI), the globally accepted method for exchanging standard business documents. EDI is a fast and efficient alternative to traditional paper-based communications that uses industry-defined standards and public data communications networks.

• Simplify processes
  Turn EDI purchase orders into sales orders and then into invoices easily with eCommerce Gateway–EDI Edition. This advanced application provides automatic, accurate, and seamless EDI processing.

• Streamline sales
  Save time receiving, entering, and error checking orders. Transmit a paperless EDI invoice back to your customer's computer, promptly and ready for payment. The time saved can translate into faster fulfillment and shipping, for more efficient sales cycles and increased customer satisfaction.

• Automate business-to-business transactions
  Jump-start your business day. EDI Edition is at work hours before your staff arrives, retrieving and verifying data, and creating outbound EDI documents, all without any manual intervention or data entry.

• Translate data flexibly
  EDI Edition includes EDI/EDGE from TIE Commerce, an easy-to-use product that provides scheduled dial-up, data communications, EDI compliance checking, and EDI data translation. You can also work with your choice of EDI translation software.

• Maximize your IT investments
  Easy-to-use and customer-proven, EDI Edition is tightly integrated with Microsoft Dynamics SL Order Management, Inventory, and Purchasing to support a comprehensive set of business-critical EDI transactions with trading partners. There are no additional software programs for users to learn, or new screens to work with.

A fast and efficient alternative to traditional paper-based communications, EDI saves time, reduces errors, eliminates paperwork, and helps companies complete in today's time-critical global marketplace.

Inbound EDI transactions supported

Outbound EDI transactions supported

Sold, implemented, and supported by Synergy Business Solutions
800-481-8590 - www.synergybusiness.com
Gold Microsoft Partner
### FEATURES  

**Effective Data Management**

ECommerce Gateway–EDI Edition maps raw EDI data into meaningful business transactions, provides needed screen and database updates, and includes a tool kit to manage inventory, customer, and order data effectively.

**Transaction Integration**

Integrate business transactions with customers and vendors who have different computer systems. EDI transmits business transactions in a standardized format between computers and across multiple computer platforms.

**Streamlined Processing**

Eliminate administrative paperwork and dramatically decrease business transaction processing times. Because transaction re-keying is practically eliminated, errors are naturally reduced.

**Inbound/Outbound Transactions**

Handle both inbound and outbound EDI transactions, including invoices, advance ship notices, warehouse shipment orders, functional acknowledgements, purchase orders, and purchase order changes.

**Process Automation**

Convert EDI purchase orders into sales orders automatically, and convert processed sales orders into EDI invoices and advance ship notices.

**Faster Cycles**

Help eliminate delays, potential errors, and clerical costs associated with manual processing of business transactions to speed turnaround on orders and enhance cash flow.

**Improved Communications**

Work the way you want with customers and trading partners around the world, regardless of the systems or data communications they use.

**Account Management**

Receive and access important customer information such as address changes, PO changes, and sales numbers.
